Default Settings

Restore Factory Default Settings

Scanning the **Reset Scanner** barcode/the **Reset Cradle** barcode can restore the scanner/cradle to the factory default settings.

You may need to reset your scanner/cradle when:

1. scanner/cradle is not properly configured so that the scanner fails to decode barcodes or to communicate with cradle;

2. you forget previous configuration and want to avoid its impact;

3. functions that are rarely used have been enabled for the time being.
